ABOUT ME

Software Developer with a strong background in backend development and cross-platform mobile applications. Skilled in building robust and scalable systems using .NET and NestJS, with solid experience designing RESTful APIs and implementing business logic. Proficient in creating seamless mobile user experiences using React Native, with attention to performance and usability across platforms.

Experienced in data-driven application development, integrating technologies like SQL, Pandas, and Power BI to enhance functionality and support decision-making. Capable of developing full-stack solutions, from backend services to frontend interfaces, applying clean architecture principles and best practices in code quality and version control.

A proactive and results-oriented professional who thrives in collaborative environments, constantly learning and adapting to deliver high-quality, impactful solutions.

EDUCATION

George Brown College

Postgraduate Certificate of Mobile Apps Development & Strategy

Toronto, ON

Sep. 2023 – Sep. 2024

Universidad de la Sabana

Bachelor of Informatics Engineering

Bogotá, COL

Feb. 2017 – Nov. 2022

TECHNICAL SKILLS AND INTERESTS

Programming Languages :Python, SQL, JavaScript, TypeScript, Rust, Kotlin, Java, Swift, C#.

Frameworks :Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, ReactJS, React Native, NestJS, Django.

Developer Tools: Jupyter Notebook, VSCode, Git, GitHub, Docker, Notion, Jira, Ubuntu, Power BI, Excel, MS365, Dataverse, SharePoint.

Cloud/Databases :AWS, Supabase, MongoDB, Firebase, MySQL, PostgreSQL, GraphQL, Github Actions, Prisma.

Areas of interest: Data Science, Machine Learning, Data Engineering, ETL Processes, Visualization, Software Development, Full-Stack Development.

Skills :Data Analysis, Predictive Modeling, Problem Solving, Workflow Optimization, Troubleshooting, Collaboration, Time Management, Agile Methodologies (Scrum), Communication, Attention to Detail, Creative Thinking, and Data Structures.

EXPERIENCE

Canam Systems

Software Developer

Toronto, ON

Jan. 2025 – Currently

- Web development in .NET, C#, React Native and SQL
- Responding to customer (internal and external) inquiries on technical issues.
- Monitor and manage technical issues relating to products.
- Log and record using our internal ticketing system, development tracking tools.

Falabella International Bank

Data Scientist

Bogotá, COL

Jan. 2022 – Aug. 2022

- Designed and implemented ETL processes to consolidate data from multiple sources, ensuring its quality and readiness for analysis.
- Automated data extraction, transformation, and loading workflows with Python and SQL, improving processing efficiency by 25%.
- Created advanced dashboards in Power BI and Tableau to provide real-time insights to sales and operations teams.
- Applied predictive analytics and data mining techniques to uncover opportunities for sales growth and better resource allocation.

PROJECTS

BookBond (Mobile Application) | *Full stack, React Native, Firebase, github actions* Mar. 2024 – Aug. 2024

A professional book rental and borrowing application developed as a work-integrated project, with regular weekly meetings to present progress.

- Developed a platform facilitating over 1000 book rentals and borrowings monthly, providing users with easy access to literature.
- Conducted 12 weekly meetings to ensure adherence to industry best practices and prepare for a production deployment.
- Utilized React Native for cross-platform development, Firebase for back-end services handling over 10,000 user interactions, and CSS for responsive and aesthetic styling.

Property Rental(Mobile Application) | *Kotlin, Firebase, Databases, Authentication* Oct. 2023 – Dec. 2023

A dual-application platform built for property owners and renters, facilitating property listings and rentals with an integrated map feature.

- Developed two applications—one for property owners to post listings, and another for renters to browse and rent properties. Enhanced user experience with location-based search functionality and real-time updates.
- Built a back-end to manage property data, user accounts, and rental agreements, ensuring secure and efficient data processing.
- Integrated maps for property location services, and implemented a robust database system to manage user interactions and property listings.

Journal Application (Web Application) | *Full Stack, ReactJS, NodeJS, Firebase* Nov. 2022 – Present

A personal journal app designed to allow users to write and manage notes with an integrated calendar for easy date-based tracking.

- Developed a journal application where users can write, edit, and save personal notes. Integrated a calendar feature for date-based note organization.
- Implemented a Firebase backend to securely store user notes and manage authentication for personalized access.
- Built intuitive navigation, enabling users to effortlessly track their entries by date, and incorporated real-time updates for seamless user experience.

Car rental(Mobile Application) | *React Native, Firebase, Databases, Authentication* Jan. 2023 – May. 2023

A dual-application platform built for car owners and renters, facilitating car listings and rentals with an integrated map feature.

- Developed two applications—one for car owners to post available vehicles, and another for renters to browse and rent cars. Enhanced user experience with location-based car search functionality.
- Implemented Firebase backend to manage car listings, user accounts, and rental transactions, ensuring secure and efficient data processing.
- Integrated maps for location-based car availability and real-time updates, allowing users to view and rent nearby vehicles seamlessly.

ADDITIONAL INFORMATION

Languages: English, Spanish.

Certifications: Scrum fundamentals certification, Python for everybody (University of Michigan Certification), Google cybersecurity certificate.

Awards/Activities: Dean's Honor List due to high grade point average (2024), Graduated with honors from George Brown College (2024)
