SUMMARY

Software developer with 2 years of experience across backend and cross-platform mobile. Works end-to-end on a production enterprise field-service platform, from .NET/C# sync APIs and REST endpoints to React Native screens and offline data sync; recent work includes an in-app invoicing and SMS-payments flow. Strongest in C#/.NET and React Native, equally comfortable on backend services and the mobile client.

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, Python, SQL, Rust, Kotlin, Java, Swift
Backend & Mobile: .NET, REST API design, React Native, Node.js, NestJS, ReactJS, Django
Data & Databases: SQL Server, PostgreSQL, MySQL, MongoDB, Pandas, NumPy, Power BI
Cloud & Tooling: AWS, Docker, Git, GitHub Actions, Firebase, Supabase, Prisma, Jira

EXPERIENCE

Canam Systems

Toronto, ON

Software Developer

Jan. 2025 – Present

- Own features end-to-end for a production field-service platform (property-restoration / insurance-claims), across a React Native mobile app and .NET/C# sync APIs.
- Designed and shipped an in-app invoicing feature that generates invoices in multiple modes (full, deductible, remaining balance) mirroring the web billing flow, and sends customers payment links over SMS via an OAuth-secured messaging API.
- Strengthened the offline-first sync engine between mobile and backend by diagnosing and fixing silent server-rejection handling, improving the reliability of field data capture.
- Fixed location-tracking and record-identity defects in the inventory (Contents) module across both the mobile client and the sync API, eliminating silent failures in item transfers and assignments.
- Implemented configurable, settings-driven inspection screens so the mobile app matches per-deployment business rules.

Falabella International Bank

Bogotá, COL

Data Scientist

Jan. 2022 – Aug. 2022

- Designed and implemented ETL processes consolidating data from multiple sources, ensuring data quality and readiness for analysis.
- Automated extract-transform-load workflows in Python and SQL, improving processing efficiency by 25%.
- Built Power BI and Tableau dashboards delivering real-time insights to sales and operations teams.
- Applied predictive analytics and data-mining techniques to surface sales-growth opportunities.

EDUCATION

George Brown College

Toronto, ON

Postgraduate Certificate, Mobile Application Development & Strategy

Sep. 2023 – Sep. 2024

- Graduated with Honours; Dean's Honour List (2024).
- **BookBond** (capstone project): cross-platform book-rental mobile app in React Native with a Firebase backend (auth, Firestore, storage); work-integrated, delivered with weekly client demos and CI via GitHub Actions.
- Relevant coursework: cross-platform & native mobile development, mobile UX/UI, cloud services, backend integration, and agile delivery.

Universidad de la Sabana

Bogotá, COL

Bachelor of Informatics Engineering

Feb. 2017 – Nov. 2022

- Relevant coursework: data structures & algorithms, software engineering, databases, operating systems, and web development.

CERTIFICATIONS & LANGUAGES

Certifications: Scrum Fundamentals; Python for Everybody (University of Michigan); Google Cybersecurity Certificate
Languages: English (fluent), Spanish (native)
